

TEETH AND ADAPTORS

Reduce your operating costs dramatically

Quality teeth and adaptors at a highly competitive price

Choose from the most extensive range in the industry

A comprehensive range to suit Caterpillar, Daewoo, ESCO, Hensley, Hitachi, H & L, Hyundai, Komatsu, Samsung, Standen, Volvo and JCB.

Ground engaging tools including teeth and adaptors, lip shrouds, ripper tynes, cast end bits, swing hammers, and specialised industrial castings in a range of types and sizes.

Major supplier to OEM

As a major supplier to Original Equipment manufacturers we produce products to suit all makes and models of loaders, excavators, dozers and general earthmoving, mining and construction machines.

Personal service through a national network

A major factor in the Cutting Edges total service philosophy is the extensive customer knowledge base built up over many years of personal service and support. This combined with a national branch and dealer network enables us to respond quickly with what you need.

Quality in design and in manufacture

There is a commitment to quality from our in-house design through the manufacturing process in our own production facilities and in foundries accredited to international quality standards.

Our Teeth and Adaptors are cast from alloy steel and get specialized heat treatment to ensure uniform through hardness and improve impact and wear resistance, resulting in high ultimate strength and long life.

QUALITY EQUIPMENT PARTS

Reduce your operating costs
from Australia's largest supplier of aftermarket parts

Ground Engaging Tools

A comprehensive range of edges & end bits, teeth and adaptors, lip shrouds, ripper boots and tynes to suit all makes and models of loaders, excavators, dozers and general earthmoving, mining and construction machines.

Crusher Wear Parts

A wide range of quality crusher wear parts to suit most machines. Castings are manufactured in a variety of materials including manganese steel, alloy steel and ductile iron.

Wearplate

Wear resistant products including wear plate, Tungsten Longlife Coating and white iron block & bar. Our CC1500 wearplate will outlast quenched and tempered steels by up to 12 times and white irons by up to 4 times.

Mining Products

Products for the mining industry include wearplate, apron feeder pans, Cutting Edges' patented ground engaging tools locking system incorporating Dynalock, R-Lock and Dynaclamp, and track shoes for a variety of machines.

Engine Parts

Quality engine parts for most brands of machinery and trucks, including rebuild kits, crankshafts, camshafts, compressors, and water pump kits. Professional service, competitive prices and off the shelf availability.

Machine Parts

Quality replacement parts to suit most machines including pins & bushes, hydraulic seals & pumps, brake components, oil & water pumps, fuel pumps and power train components. Comprehensive warranty on all parts.
